DETAILED ACTION

Page 2

Election/Restriction

1. Upon review of the instant case, the application was deemed to contain claims directed to patentably distinct species of the claimed invention. Election from the following species is required. Note: applicant must elect *one* species from *each* subgroup below.

Subgroup 1: Species of substituted aniline derivative (see claims 13 and 15)

Applicant must elect for purposes of search a *single species* of substituted aniline derivative. Furthermore, applicant must show *all* atoms and bonds that are necessary to define said substituted aniline derivative. Applicant should NOT use general notations like R^1 , R^2 , etc. when defining the structure because these labels represent more than one chemical group and thus more than one compound would be erroneously elected.

Subgroup 2: Species of acylating agent (see claims 13 and 16)

Applicant must elect for purposes of search a *single species* of acylating agent. Furthermore, applicant must show *all* atoms and bonds that are necessary to define said acylating agent. Applicant should NOT use general notations like R^1 , R^2 , etc. when defining the structure because these labels represent more than one chemical group and thus more than one compound would be erroneously elected.

Subgroup 3: Species of LXR ligand (see claims 13 and 19)

Applicant must elect for purposes of search a *single species* of LXR ligand. Furthermore, applicant must show *all* atoms and bonds that are necessary to define said LXR ligand. Applicant should NOT use general notations like R^1 , R^2 , etc. when defining the structure because these labels represent more than one chemical group and thus more than one compound would be erroneously elected.

Subgroup 4: Species of polymer (see claims 13 and 17)

Applicant must elect for purposes of search a single species of polymer (e.g., Merrifield resin).

Application/Control Number: 10/749,530 Page 3

Art Unit: 1639

2. <u>Please Note:</u> Applicants must disclose which claims read on the elected species (see paragraphs 5 and 6 below).

- 3. The species are distinct, each from the other, because their structures (i.e., an acylated aniline derivative is not an recognized core structure) and modes of action are different. They would also differ in their reactivity and the starting materials from which they are made. For different species of method, the method steps for each species would differ. Moreover, the above species can be separately classified. Consequently, the species have different issues regarding patentability and represent patentably distinct subject matter. Therefore, this does create an undue search burden, and election for examination purposes as indicated is proper.
- 4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.
- 5. Applicant is advised that a reply to this requirement <u>must include an identification of the</u>

 <u>species that is elected consonant with this requirement</u>, <u>and a listing of all claims readable</u>

 <u>thereon including any claims subsequently added</u>. An argument that a claim is allowable or that all claims are generic is considered <u>nonresponsive</u> unless accompanied by an election.
- 6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Application/Control Number: 10/749,530 Page 4

Art Unit: 1639

limitations of an allowed generic claim as provided by 37 CFR 1.141. <u>If claims are added after</u> the election, <u>applicant must indicate which are readable upon the elected species</u>. MPEP § 809.02(a).

- 7. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
- 8. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Because the above restriction/election requirement is complex, a telephone call to applicants to request an oral election was not made. See MPEP § 812.01.
- 9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Application/Control Number: 10/749,530

Art Unit: 1639

Page 5

10. Applicant is also reminded that a 1 - month (not less than 30 days) shortened statutory period will be set for response when a written requirement is made without an action on the merits. This period may be extended under the provisions of 37 CFR 1.136(a). Such action will not be an "action on the merits" for purposes of the second action final program, see MPEP 809.02(a).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jon D Epperson whose telephone number is (571) 272-0808. The examiner can normally be reached Monday-Friday from 9:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Wang can be reached on (571) 272-0811. The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1235.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
